Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830

SAFETY DATA SHEET

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier	
Product name	Castrol Transmax CVT
Product code	467204-DE04
SDS no.	467204
Product type	Liquid.
1.2 Relevant identified uses	of the substance or mixture and uses advised against
Use of the substance/ mixture	Automatic transmission fluid For specific application advice see appropriate Technical Data Sheet or consult our company representative.
1.3 Details of the supplier of	f the safety data sheet
Supplier	Castrol (UK) Limited PO Box 354, Chertsey Road, Sunbury On Thames, Middlesex, TW16 9AW
	Orders/Enquiries: 0845 6008125 Technical Enquiries: 0845 082 1719 BP (Ireland) Ireland Orders/Enquiries: 1850 930 3942 Ireland Technical Enquiries: 1800 509 353
E-mail address	MSDSadvice@bp.com
1.4 Emergency telephone nu	umber
EMERGENCY TELEPHONE NUMBER	Carechem: +44 (0) 1235 239 670 (24/7)
SECTION 2: Hazards	identification
2.1 Classification of the subs	stance or mixture
Product definition	Mixture
Classification according to Not classified.	Regulation (EC) No. 1272/2008 [CLP/GHS]
See sections 11 and 12 for m	ore detailed information on health effects and symptoms and environmental hazards.
2.2 Label elements	
Signal word	No signal word.
Hazard statements	No known significant effects or critical hazards.
Precautionary statements	

r recautionary statements	
Prevention	Not applicable.
Response	Not applicable.
Storage	Not applicable.
Disposal	Not applicable.
Supplemental label elements	Not applicable.
EU Regulation (EC) No. 1907	7/2006 (REACH)

SECTION 2: Hazards identification

Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	Not applicable.			
Special packaging requirement	nts			
Containers to be fitted Not applicable. with child-resistant fastenings				
Tactile warning of danger	Not applicable.			
2.3 Other hazards				
Other hazards which do not result in classification	Defatting to the skin.			
SECTION 3: Composition/information on ingredients				
Substance/mixture	Mixture			
Highly refined base oil (IP 346 DMSO extract < 3%). Proprietary performance additives.				
Product/ingredient name	Identifiers	%	Regulation (EC) No. 1272/2008 [CLP]	Туре

Distillates (petroleum), hydrotreated light paraffinic	REACH #: 01-2119487077-29 EC: 265-158-7 CAS: 64742-55-8 Index: 649-468-00-3	≥25 - ≤50	Asp. Tox. 1, H304	[1] [2]
Methacrylate copolymer	Proprietary	<10	Eye Irrit. 2, H319	[1]
See Section 16 for the full text of the	e H statements declared above.			

Type

[1] Substance classified with a health or environmental hazard

[2] Substance with a workplace exposure limit

[3] Substance meets the criteria for PBT according to Regulation (EC) No. 1907/2006, Annex XIII

[4] Substance meets the criteria for vPvB according to Regulation (EC) No. 1907/2006, Annex XIII

[5] Substance of equivalent concern

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid measures

Eye contact	In case of contact, immediately flush eyes with plenty of water for at least 15 minutes. Eyelids should be held away from the eyeball to ensure thorough rinsing. Check for and remove any contact lenses. Get medical attention.
Skin contact	Wash skin thoroughly with soap and water or use recognised skin cleanser. Remove contaminated clothing and shoes. Wash clothing before reuse. Clean shoes thoroughly before reuse. Get medical attention if irritation develops.
Inhalation	If inhaled, remove to fresh air. Get medical attention if symptoms appear.
Ingestion	Do not induce vomiting unless directed to do so by medical personnel. Get medical attention if symptoms occur.
Protection of first-aiders	No action shall be taken involving any personal risk or without suitable training.

4.2 Most important symptoms and effects, both acute and delayed

See Section 11 for more detailed information on health effects and symptoms.

4.3 Indication of any immediate medical attention and special treatment needed Notes to physician Treatment should in general be symptomatic and directed to relieving any effects.

SECTION 5: Firefighting measures

5.1 Extinguishing media	
Suitable extinguishing media	In case of fire, use foam, dry chemical or carbon dioxide extinguisher or spray.
Unsuitable extinguishing media	Do not use water jet.
5.2 Special hazards arising from	m the substance or mixture
Hazards from the substance or mixture	In a fire or if heated, a pressure increase will occur and the container may burst.
Hazardous combustion products	Combustion products may include the following: carbon oxides (CO, CO ₂) (carbon monoxide, carbon dioxide)
5.3 Advice for firefighters	
Special precautions for fire-fighters	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.
Special protective equipment for fire-fighters	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Clothing for fire-fighters (including helmets, protective boots and gloves) conforming to European standard EN 469 will provide a basic level of protection for chemical incidents.

SECTION 6: Accidental release measures

6.1 Personal precautions, prote	ctive equipment and emergency procedures
For non-emergency personnel	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Floors may be slippery; use care to avoid falling. Put on appropriate personal protective equipment.
For emergency responders	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
6.2 Environmental precautions	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).
6.3 Methods and material for co	ntainment and cleaning up
Small spill	Stop leak if without risk. Move containers from spill area. Absorb with an inert material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	Stop leak if without risk. Move containers from spill area. Prevent entry into sewers, water courses, basements or confined areas. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations. Dispose of via a licensed waste disposal contractor.
6.4 Reference to other sections	See Section 1 for emergency contact information. See Section 5 for firefighting measures. See Section 8 for information on appropriate personal protective equipment. See Section 12 for environmental precautions. See Section 13 for additional waste treatment information.

SECTION 7: Handling and storage

7.1 Precautions for safe hand	ling
Protective measures	Put on appropriate personal protective equipment.
Advice on general occupational hygiene	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Wash thoroughly after handling. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

SECTION 7: Handling	and storage		
7.2 Conditions for safe storage, including any incompatibilities	Store in accordance with local regulations. Store in a dry, cool and well-ventilated from incompatible materials (see Section 10). Keep away from heat and direct sur container tightly closed and sealed until ready for use. Containers that have been be carefully resealed and kept upright to prevent leakage. Store and use only in excontainers designed for use with this product. Do not store in unlabelled containers	nlight. Keep opened must quipment/	
Not suitable	Prolonged exposure to elevated temperature.		
7.3 Specific end use(s)			
Recommendations	See section 1.2 and Exposure scenarios in annex, if applicable.		
SECTION 8: Exposure	e controls/personal protection		
8.1 Control parameters			
Occupational exposure limits	1		
Product/ingredie	ent name Exposure limit values		
₱ stillates (petroleum), hydrotre	eated light paraffinic ACGIH TLV (United States). TWA: 5 mg/m ³ 8 hours. Issued/Revised: 11/2009 Form: Inha	alable fraction	
	n components may be shown in this section, other components may be present in any efore, the specific OELs may not be applicable to the product as a whole and are pro		
Recommended monitoring procedures	If this product contains ingredients with exposure limits, personal, workplace atmost biological monitoring may be required to determine the effectiveness of the ventilat control measures and/or the necessity to use respiratory protective equipment. Re should be made to monitoring standards, such as the following: European Standar (Workplace atmospheres - Guidance for the assessment of exposure by inhalation agents for comparison with limit values and measurement strategy) European Stan 14042 (Workplace atmospheres - Guide for the application and use of procedures assessment of exposure to chemical and biological agents) European Standard E (Workplace atmospheres - General requirements for the performance of procedures measurement of chemical agents) Reference to national guidance documents for the determination of hazardous substances will also be required.	tion or other eference rd EN 689 to chemical ndard EN for the N 482 es for the	
Derived No Effect Level No DNELs/DMELs available.			
Predicted No Effect Concentr No PNECs available	<u>ation</u>		
8.2 Exposure controls			
Appropriate engineering controls	 Provide exhaust ventilation or other engineering controls to keep the relevant airbor concentrations below their respective occupational exposure limits. All activities involving chemicals should be assessed for their risks to health, to enexposures are adequately controlled. Personal protective equipment should only be after other forms of control measures (e.g. engineering controls) have been suitabe Personal protective equipment should conform to appropriate standards, be suitable kept in good condition and properly maintained. Your supplier of personal protective equipment should be consulted for advice on appropriate standards. For further information contact your national organisation of The final choice of protective equipment will depend upon a risk assessment. It is ensure that all items of personal protective equipment are compatible. 	sure be considered ly evaluated. ble for use, be selection and for standards	
Individual protection measure			
Hygiene measures	Wash hands, forearms and face thoroughly after handling chemical products, befor smoking and using the lavatory and at the end of the working period. Ensure that stations and safety showers are close to the workstation location.		
Respiratory protection	Case of insufficient ventilation, wear suitable respiratory equipment. The correct choice of respiratory protection depends upon the chemicals being ha conditions of work and use, and the condition of the respiratory equipment. Safety should be developed for each intended application. Respiratory protection equipm therefore be chosen in consultation with the supplier/manufacturer and with a full a of the working conditions.	procedures ent should	
Eye/face protection	Safety glasses with side shields.		

SECTION 8: Exposure controls/personal protection

Hand protection

Because specific work environments and material handling practices vary, safety procedures should be developed for each intended application. The correct choice of protective gloves depends upon the chemicals being handled, and the conditions of work and use. Most gloves provide protection for only a limited time before they must be discarded and replaced (even the best chemically resistant gloves will break down after repeated chemical exposures).

Gloves should be chosen in consultation with the supplier / manufacturer and taking account of a full assessment of the working conditions.

Recommended: Nitrile gloves. **Breakthrough time:**

Breakthrough time data are generated by glove manufacturers under laboratory test conditions and represent how long a glove can be expected to provide effective permeation resistance. It is important when following breakthrough time recommendations that actual workplace conditions are taken into account. Always consult with your glove supplier for up-to-date technical information on breakthrough times for the recommended glove type. Our recommendations on the selection of gloves are as follows:

Continuous contact:

Gloves with a minimum breakthrough time of 240 minutes, or >480 minutes if suitable gloves can be obtained.

If suitable gloves are not available to offer that level of protection, gloves with shorter breakthrough times may be acceptable as long as appropriate glove maintenance and replacement regimes are determined and adhered to.

Short-term / splash protection:

Recommended breakthrough times as above.

It is recognised that for short-term, transient exposures, gloves with shorter breakthrough times may commonly be used. Therefore, appropriate maintenance and replacement regimes must be determined and rigorously followed.

Glove Thickness:

For general applications, we recommend gloves with a thickness typically greater than 0.35 mm.

It should be emphasised that glove thickness is not necessarily a good predictor of glove resistance to a specific chemical, as the permeation efficiency of the glove will be dependent on the exact composition of the glove material. Therefore, glove selection should also be based on consideration of the task requirements and knowledge of breakthrough times. Glove thickness may also vary depending on the glove manufacturer, the glove type and the glove model. Therefore, the manufacturers' technical data should always be taken into account to ensure selection of the most appropriate glove for the task.

Note: Depending on the activity being conducted, gloves of varying thickness may be required for specific tasks. For example:

• Thinner gloves (down to 0.1 mm or less) may be required where a high degree of manual dexterity is needed. However, these gloves are only likely to give short duration protection and would normally be just for single use applications, then disposed of.

• Thicker gloves (up to 3 mm or more) may be required where there is a mechanical (as well as a chemical) risk i.e. where there is abrasion or puncture potential.

Skin and body

Use of protective clothing is good industrial practice.

Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

Cotton or polyester/cotton overalls will only provide protection against light superficial contamination that will not soak through to the skin. Overalls should be laundered on a regular basis. When the risk of skin exposure is high (e.g. when cleaning up spillages or if there is a risk of splashing) then chemical resistant aprons and/or impervious chemical suits and boots will be required.

Product name	Castrol Transmax CVT
Version 2.06	Date of issue 24 July 2017

0.0

	Product code 46720	4-DE04	Page: 5/10
Format	United Kingdom (UK) (United Kingdom)	Language	ENGLISH

SECTION 8: Exposure controls/personal protection

Refer to standards:	Respiratory protection: EN 529
	Gloves: EN 420, EN 374
	Eye protection: EN 166
	Filtering half-mask: EN 149
	Filtering half-mask with valve: EN 405
	Half-mask: EN 140 plus filter
	Full-face mask: EN 136 plus filter
	Particulate filters: EN 143
	Gas/combined filters: EN 14387
Environmental exposure controls	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

9.1 Information on basic physical and chemical properties

Appearance	
Physical state	Liquid.
Colour	Red.
Odour	Not available.
Odour threshold	Not available.
рН	Not available.
Melting point/freezing point	Not available.
Initial boiling point and boiling range	Not available.
Pour point	-45 °C
Flash point	Open cup: 214°C (417.2°F) [Cleveland.]
Evaporation rate	Not available.
Flammability (solid, gas)	Not available.
Upper/lower flammability or explosive limits	Not available.
Vapour pressure	Not available.
Vapour density	Not available.
Relative density	Not available.
Density	846.3 kg/m³ (0.846 g/cm³) at 15°C
Solubility(ies)	insoluble in water.
Partition coefficient: n-octanol/ water	Not available.
Auto-ignition temperature	Not available.
Decomposition temperature	Not available.
Viscosity	Kinematic: 33.81 mm²/s (33.81 cSt) at 40°C Kinematic: 7.146 mm²/s (7.146 cSt) at 100°C
Explosive properties	Not available.
Oxidising properties	Not available.

9.2 Other information

No additional information.

SECTION 10: Stability and reactivity					
10.1 Reactivity	No specific test data availa materials for additional infe		t. Refer to Conditi	ons to avoid and	Incompatible
10.2 Chemical stability	The product is stable.				
10.3 Possibility of hazardous reactions	Under normal conditions o Under normal conditions o	•			ccur.
10.4 Conditions to avoid	Avoid all possible sources	of ignition (spark o	or flame).		
Product name Castrol Transm	nax CVT		Product code 467	204-DE04	Page: 6/10
Version 2.06 Date of issue	e 24 July 2017	Format	United Kingdom (UK) (United Kingdom)	Language	ENGLISH

Conforms to Regulation (EC) No. 1907/2006 (REACH), Annex II, as amended by Commission Regulation (EU) 2015/830

SECTION 10: Stability and reactivity

10.5 Incompatible materials Reactive or incompatible with the following materials: oxidising materials.

10.6 HazardousUnder normal conditions of storage and use, hazardous decomposition products should not be
produced.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

Acute toxicity estimates
